## ACCURACY OF THIS CATALOG

We have tried to ensure that the information contained in this catalog is accurate. We cannot be responsible for misprints or errors. This catalog is merely a guide and is meant to aid the customer in the selection of our products. The drawings contained herein represent the profiles closely but they are not CAD drawings. There may be slight differences between the actual profile and these drawings. The differences, however, will be slight and should not have any affect. Where the exact size of a profile is critical, for whatever reason, it is the customer's responsibility to alert us to this fact so that we can confirm the information and provide an actual sample and/or CAD drawing. Duplication of this catalog, in whole or part, without the written permission of Mouldings Unlimited, Inc. is strictly prohibited.

## STOCK PROGRAM

Currently, we have one of largest selection of mouldings available, and we are always changing our profiles to meet market demands. We stock over 150 different profiles in six different species of wood, which includes cherry, mahogany, maple, oak, pine, and poplar. We offer a finger jointed product in over 200 profiles, which is currently our biggest seller. When considering our finger jointed products, we highly recommend our primed application. We achieve excellence in our primed product by applying two coats of water based primer and additionally buffing the product to create a smooth finished surface. We strongly recommend each customer to check inventory on catalog profiles. If the profile is not in inventory we will do our utmost to produce the item in a timely manner.

## CUSTOM MOULDINGS

When a customer requires a profile that is different from those shown in this catalog we can certainly accommodate them. We make all of our tooling so we can match your profile. We require a drawing or sample in order to make the tooling. There is a nominal tooling charge and setup fee for this service. The amount of these charges will depend on the size of the profile, the detail of the profile, and the quantity required.

## DELIVERY

Delivery charge for a particular order will be determined at the time the order is placed. Factors that impact the delivery charge include the location, the size of the order, and the delivery schedule. However, we will do whatever we can to deliver the moulding at an affordable price.

## PRICING

We have a very good track record for having competitive pricing and for delaying price increases. However, due to fluctuating raw material cost product pricing is not always constant. Custom woods are more vulnerable to cost increases than stock mouldings. For these reasons, we reserve the right to increase our prices without notice.

## RETURN POLICY

We require 25% restocking fee. This will be given under certain stipulations. All wood must be brought back the way it was picked up. We do not except wood that has been cut or damaged. We do not allow custom jobs to be returned.
